## needed tools:

allen-key size 4, 5

spanner/ringspanner size 10

Thank you very much for purchasing a new accessory for your R 1100 S from WÜDO.

Your new luggage plate allows you to use the soft bag of the K 1200 RS as well. So you will enlarge the storage capacity for light weighted luggage of your sportboxer in an elegant, but also simple way. Easy to install before a tour and easy to dismantle afterwards, the additional storage capacity won't influence the sporty design of your R 1100 S.

Much pleasure with your additional storage capacity and lots of safe miles on tour.

Helmut Wüstenhöfer

## Installation of the luggage plate at the R 1100 S

In the beginning you have to install the holder plate of the BMW softbag on the WÜDO luggage plate. For this you have to fix both halves with the enclosed 7 spacers, the screws, the washers and the nuts at the bottom of the holder plate. Please take care that both halves will be fixed together in the middle at the rear screw (ill. 1).

ill. 1

## installation with case holders

After the preparation of the luggage plate you have to dismantle the rear screws of the BMW case holders.

In the drillings you have to put the 4 enclosed spacers (ill. 2).

ill. 2

Now you can put on the luggage plate and have to fix it with the allen screws M 6 x 60 and their washers (ill. 3).

ill. 3

Finally you only have to fix the BMW softcase on the luggage plate according to the instructions of BMW which are delivered together with the softcase.

installed WÜDO luggage plate

### **installation without case holders**

After the preparation of the luggage plate you have to dismantle the eyes for fixing luggage at both sides.

Instead of them you have to use the enclosed longer spacers. Please take care to use the thin ones forward (in driving direction) and the thick ones in the rear (in drivinh direction).

Now you can put on the luggage plate and have to fix it with the allen screws M 6 x 60 and their washers.

Finally you only have to fix the BMW softcase on the luggage plate according to the instructions of BMW which are delivered together with the softcase.

### **Additional important tip!!**

**Please take care that you do not load the luggage plate with their softcase with a higher weight of more than 1 - 1,5 kg.**

**Both parts, softcase and luggage plate, are not designed for a higher weight.**
